This is in response to Papers faxed on 25 April 2005.

I. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. William I. Solomon on 25 May 2005.

AMENDMENT: Claim 14 has been canceled.

II. The newly submitted English language portions of the cited Japanese applications '828, '620 and '862 have been considered.

III. The following is an examiner's statement of reasons for allowance: Applicant's amendment and arguments have been carefully considered. It is correct that the applied JP '665 on the record is related to a negative photosensitive resin (polymer) composition comprising a resin of unsaturated cyclic caps of polyamide containing units, the photoreactive compound being a photoinitiator to cause a reaction or crosslinking or hardening of the reacted polymer in a region being radiated and diluting organic solvent. The claims have been added with (1) a photoreactive compound "which generates an acid upon undergoing a reaction with light" and "wherein said photosensitive resin composition is a positive photosensitive resin composition"

that is sufficient to overcome the applied JP '665 on the record. New search for all claims have been made. However, no pertinent prior art against the amended claims is found. Accordingly, claims 1-17 are allowable over JP '665.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

IV. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoa V. Le whose telephone number is 571-272-1332.
